

Real Estate Skills

Installation Manual & User Guide

Claude skills for real estate agents: buyer and seller CMAs, offer strategy, offer reviews and contract timelines, all with your name, brokerage and brand colors.

PART I · GETTING STARTED

- 1 Welcome
- 2 Before You Start
- 3 Install the Plugin
- 4 Set Up Your Profile
- 5 Set Up Your MLS Export

PART II · PREPARING A PROPERTY

- 6 Pull the Comps
- 7 Download the Property Report

PART III · USING THE SKILLS

- 8 The Skills
- 9 Your First Deal, Start to Finish
- 10 Best Practices

PART IV · REFERENCE

- 11 Other MLS Systems
- 12 Updating to a New Version
- 13 Contact and Support

1 Welcome

Real Estate Skills adds a set of real estate skills to Claude. Once it's installed and your profile is saved, you pick a skill by typing / and its name in a chat (for example `/buyer-cma`), ask in plain words, and get client-ready reports that carry your name, brokerage and brand colors.

What's in the Download

- **The plugin file** (`real-estate-<version>.plugin`): the plugin you install in the Claude desktop app. The version number in the name changes with each release.
- `README.md` : the text version of this guide.

How It Works at a Glance

How often	What you do	Where
Once	Install the plugin, save your profile, and create the MLS export.	Sections 3–5
Each property	Pull the comps (a CSV) and download the property report (a PDF) from your MLS.	Sections 6–7
Each deal	Upload those files, ask Claude, review the report and send it.	Sections 8–10
Each release	Upload the new plugin file.	Section 12

The MLS steps use **Stellar MLS (Matrix)** as the example. Other MLS systems work the same way: see section 11. Screens may look slightly different in later versions of the plugin, the Claude app or your MLS; the steps stay the same.

2 Before You Start

Have these ready before you install:

- ☐ **The Claude desktop app**, signed in to your account.
- ☐ **The plugin file** from the download, unzipped.
- ☐ **Your MLS login**, with access to searches, exports and printing.
- ☐ **Your branding details** for the profile: your name as it appears on documents, your brokerage's licensed name, contact details and license number, and your logo, business card or website.

3 Install the Plugin

1. Unzip the download.
2. Open the Claude desktop app and go to the plugin settings.
3. Choose **Upload local plugin**.

Open Customize in the sidebar.

On the Plugins tab, click Add, then Upload plugin.

4. Drag the `.plugin` file onto the upload area (or click **browse** and pick it), then click **Upload**.

Pick the .plugin file inside the unzipped folder, not the .zip.

The plugin file and its preview. Click Upload.

Upload the `.plugin` file itself, not the zip or the unzipped folder. The skills then appear as `real-estate:agent-profile`, `real-estate:buyer-cma` and so on. To use one, type `/` and its name in a chat (for example `/buyer-cma`) and select it from the list. Section 8 gives each skill's name.

Once installed, the plugin's Skills tab lists every skill with its `/` name.

4 Set Up Your Profile

Once, about two minutes. Do this first. Every report after it carries your name, brokerage, license, contact details and brand colors, and every client note sounds like you.

1. Start a new chat.
2. Type `/agent-profile` and select it from the list, then type **"Set me up."**
3. Answer two short rounds of questions. Skip anything you like. Have these handy:
 - Your name as it appears on documents and your brokerage's licensed name.
 - Team name, phone, email, website and license number (any or none).
 - Your logo, business card or website, for your brand colors (or say "pick for me").
 - Any disclaimer your brokerage requires.
 - How clients would describe the way you talk, or an email you've written.
4. You get two files:
 - **profile.md**: who you are. The other skills read it.
 - **project-instructions.md**: a short prompt for a Claude Project.
5. Follow the steps Claude gives you to create a **Project** with both files. From then on, start your real estate work inside that Project and Claude knows who you are without being asked.

To change something later, just say it: "My new number is 407-555-0100", "I moved to LPT Realty", "Use navy for my reports."

5 Set Up Your MLS Export

Once, about ten minutes. The CMA skills read a spreadsheet (CSV) of nearby listings and sales. Set up a custom export once and reuse it for every property.

1. In Matrix, click **Hello, [Your Name]** at the top right, then **Settings**, then **Custom Exports**.

Click Hello, [Your Name], then Settings.

On the Settings page, open Custom Exports.

2. Click **Add Export** and name it **Basic CMA Export**.

Manage Custom Exports: click Add Export.

3. For each field in the table below, type its name in the **Search** box under **Available Fields** (left), then click **Add** to move it to **Export Fields** (right). The order doesn't matter.

Search for the field (here, Heated Area), select it, then click Add.

4. At the bottom, set **Separator** to **Comma** and **Include Column Names** to **Name**.

5. Click **Save**.

Set Export Definition Cross Property [Cancel] [Save]

Export Name:
Basic CMA Export

Available Fields

- # of Bays
- # of Bays (Dock High)
- # of Bays (Grade Level)
- # of Conference/Meeting Rooms
- # of Hotel/Motel Rooms-DO NOT USE
- # of Offices
- # of Pets Allowed
- # of Restrooms
- \$/SqFt
- Accessibility Features

Search:

Separator: ☒ Comma ☐ Tab

Include Column Names: ☐ None ☒ Name ☐ Label

Export Fields

- MLS Number
- Address
- Unit Number
- Zip
- Legal Subdivision Name
- Status
- Latitude
- Longitude
- Original List Price
- List Price

Buttons: Add->, <-Remove, Up, Down

The finished export: named Basic CMA Export, fields added, Comma and Name selected, then Save (top right).

Recommended Columns

Add these fields, shown here as Matrix labels them. Only the five marked **Required** are needed; the rest sharpen the comp ranking, the adjustments and the market read.

Field	Used For
MLS Number	Telling listings apart
Address	REQUIRED Matching the home and removing duplicates
Unit Number	Condos and townhomes
Zip	Location
Legal Subdivision Name	Same-neighborhood comps
Status	REQUIRED Sold, active, pending, expired, canceled
Latitude	Distance from the home
Longitude	Distance from the home
Original List Price	Price cuts and list-to-sale ratios
List Price	REQUIRED Active and pending prices
Close Price	REQUIRED Sold prices
Contract Date	How fast homes go under contract
Close Date	How recent a sale is
CDOM	Days on market across relists
Sold Terms	Cash vs. loan sales
Sold Remarks	What happened at the sale
Seller Paid Buyer Costs	Seller credits in past sales
Special Sale Provision(s)	Short sales, foreclosures, estate sales
New Construction YN	Builder sales

Field	Used For
Property Style	Single family, townhouse, condo
Heated Area	REQUIRED Size and price per square foot
Beds	Bedroom adjustments
Full Baths	Bathroom adjustments
Half Baths	Bathroom adjustments
Floors in Unit/Home	One vs. two story
Floor Number	Condo floor
Year Built	Age
Exterior Construction	Block vs. frame
Garage Spaces	Garage adjustments
Pool Private Y/N	Pool adjustments
Furnishings	Furnished sales
Lot Size Acres	Lot adjustments
Water Frontage Y/N	Waterfront premium
Water Frontage	Type of waterfront
Water Access	Water access
Water View Y/N	Water views
Water View	Type of water view
Sewer	Septic vs. public sewer
Water	Well vs. public water
Flood Zone Code	Flood risk and insurance
Housing for Older Persons Y/N	55+ communities
Land Lease Y/N	Land lease homes
Total Annual Association Fees	HOA costs (the yearly total)
HOA Fee	Reference (the yearly total above is what's used)
Public Remarks	Condition and updates

6 Pull the Comps

With setup done, each property needs two files from your MLS: the **comps CSV** (this section) and the **property report PDF** (section 7). The CMA skills need both; the offer and contract skills build on the CMA.

Each property, a few minutes.

1. Go to **Search**, then **Residential**, then **Quick**.

Search > Residential > Quick.

2. **Statuses:** check **Active**, **Pending**, **Sold**, **Expired** and **Canceled (WDN-U)**. Matrix fills in **0-180** days (the last 6 months) for each one except Active; leave it as is.
3. **Location:** in **Within [1] miles of [address]**, keep **1** and enter the property's address. You don't need to draw on the map.
 - In a rural area with few sales, widen to 2 or 3 miles.
 - In a dense area or a big subdivision, 0.5 mile is often enough.

 A screenshot of a web form titled 'Quick'. On the left, under 'Status - Date or Range', there are checkboxes for 'Coming Soon', 'Active', 'Pending', 'Temporarily Off-Market', 'Canceled (WDN-U)', 'Withdrawn Conditional', 'Sold', 'Expired', 'Leased', and 'with Backups'. Each checked status has a date range of '0-180' next to it. On the right, under 'Map Search:', there is a text input for 'Within 1 miles of 451 E Altamonte Dr, Al' and a 'Clear Map' link. Below this is a table with columns: St #, Dir Pfx, Street Name, St Type, Dir Sfx, and Unit #. There is a 'More' button next to the table. At the bottom, there is a 'State:' dropdown menu with 'Florida' selected, and radio buttons for 'Or' and 'Not'.

The five statuses checked (Matrix fills in 0-180), and Within 1 miles of the address.

The Map tab shows the 1-mile radius Matrix draws for you.

4. **Property style:** select the styles that match the home (for example Single Family Residence, or Townhouse and Villa for a townhome, or Condominium for a condo). Single-family homes and townhouses can go together when they're similar in size and price.
5. Check the count. **It must be under 500.** If it's over, narrow it until it's under:
 - Shrink the radius (1 mile to 0.5 mile).
 - Add a heated square footage range, about 30% above and below the home.
 - Add a year built range or a minimum number of bedrooms.
 - Shorten the days to 0-90.

Export 47 Records

Export file format: **Basic CMA Export** [Export](#) [Edit Custom Export](#)

[Back to Results](#)

Choose Basic CMA Export and click Export.

Every row checked (Checked 47); Export is in the action bar at the bottom.

Upload the file exactly as downloaded. Opening and saving it in Excel can change dates and numbers.

7 Download the Property Report

The property report is the home's full record in one PDF: the listing, public records, taxes, the full listing history across MLS numbers, flood data and photos. In Stellar it's the **360 Property View**. Where you get it depends on the side you're working.

For a Buyer (a Home for Sale Now)

1. Search for the active listing by MLS number or address and open it.
2. Check only this home. **Print** uses every checked listing, so if you came from search results, click **None** first, then check this one.
3. Click **Print** and choose the **360 Property View** format.
4. Select **Print All Tabs**.
5. Click **Print to PDF** and save the file.

Previous Next • 1 of 47 Checked 47 All • None • Page Agent Single Line display

Coming from search results, every listing is checked (Checked 47). Click None, then check this home.

360 Property View with Print All Tabs checked, then Print to PDF.

For a Seller (Your Listing Appointment)

1. Go to **Search**, then **Public Record**. This opens **Tax Search**; search by the address.

Search > Public Record.

A screenshot of the 'Tax Search' form. It has two main sections: 'Ownership' and 'Location'. The 'Location' section includes fields for 'St #', 'Direction', 'Street Name', 'Type', 'Direction', 'Unit #', 'County', 'City', 'Zip Code', and 'Folio / Strap / PID'. The 'Map Search' section includes fields for 'Neighborhood', 'Subdivision', 'Municipality', 'School District', and 'Building Name'. There are also checkboxes for 'Foreclosure Indicator' and 'Actively in Foreclosure'.

Tax Search: enter the street number, street name and zip under Location.

2. Click the result's **Folio/PID** link to open its **360 Property View**.
3. The **Last Listing** tab has the home's most recent MLS listing (usually from when the seller bought it), so you don't need to find it separately.

Click the Folio/PID link (owner name hidden here).

The Last Listing tab already has the home's most recent MLS listing.

4. Click **Print**, choose **360 Property View**, select **Print All Tabs**, then click **Print to PDF** and save the file.

By default only the Tax tab is checked...

...so check Print All Tabs before Print to PDF.

For a seller the report is usually years old, so Claude uses it for the facts that don't change (size, lot, taxes, history) and asks what the seller has updated since.

The report includes owner names, mortgage history and agent-only remarks. The skills use these for your own read and never put them in anything a client sees.

8 The Skills

You have the comps CSV and the property report. Now ask Claude.

Type / and the skill's name (shown next to each heading below), select it, then ask in plain words and attach the files. Claude asks for anything missing, and every question can be skipped: you'll get a report marked Preliminary instead of a stop.

Keep a deal together. A CMA and the offer work after it share numbers when they're in the same chat. In a new chat, upload the CMA PDF (or keep it in the deal's Project, section 10) and Claude reads the value range from it.

Buyer CMA `/buyer-cma`

What a home is worth, how the asking price compares, your buyer's real monthly cost, and a suggested opening offer with a target and a walk-away.

- **Upload:** the 360 Property View PDF for the listing and the comps CSV.
- **Tell Claude:** the buyer's timeline, how they're financing (loan type, down payment) and how much they want this house.
- **Example:** "Run a buyer CMA on 123 Oak St. My buyer is FHA with 3.5% down, their lease ends in March, and they love it."
- **You get:** a PDF report to send, or a short summary in chat.

Buyer Offer Strategy `/buyer-offer-strategy`

The strongest offer inside your buyer's limits, up to two alternatives, and how it stacks up against other offers.

- **Best inputs:** a buyer CMA from the same chat; the buyer's max price, cash available, reserves they want to keep and max monthly payment; and what the listing agent told you (other offers, deadline, what the seller cares about).
- **Minimum:** the list price and the buyer's cash.
- **Example:** "What should we offer? My buyer can go to \$450,000, has \$40,000 cash and wants to keep \$10,000. The listing agent says there are two other offers and they want to close in 30 days."
- **You get:** an Offer Options report and an Offer Package Worksheet (the contract entries, riders and a checklist).

Seller CMA `/seller-cma`

A recommended list price, three pricing strategies with the seller's estimated net at each, and a launch plan.

- **Upload:** the 360 Property View PDF from the last sale and the comps CSV.
- **Tell Claude:** what the seller has updated since they bought (with years, roof first), known issues, their timeline, and their mortgage payoff if you have it.
- **Example:** "Seller CMA for 456 Pine Ave. They replaced the roof in 2023 and redid the kitchen in 2021. Payoff is about \$210,000. They'd like to be moved by June."
- **You get:** a PDF report. Ask for a **listing presentation** too and you also get an editable PowerPoint with the same numbers.

Seller Offer Review `/seller-offer-review`

Reviews the offers on your listing. It works two ways, depending on how many offers you upload.

One offer: the seller's net (as offered, and if the appraisal or inspection goes badly), how likely it is to close, the risks, and a counter.

- **Example:** "We got an offer on 456 Pine Ave. Should my seller accept, and what should we counter?"

Two or more offers: everything above for each offer, plus a side-by-side ranking and a plan: which offer to counter, which to hold as a backup and which to decline.

- **Example:** "We got three offers on 456 Pine Ave. Which is best and what should we do with each?"
- A single offer turns into a comparison when another one arrives: upload it in the same chat.

For both:

- **Upload:** each offer (the contract with its addenda), plus pre-approval letters or proof of funds.
- **Best inputs:** a seller CMA from the same chat, the seller's payoff, and what matters most to them (price, speed, certainty).
- **Minimum:** list price, and each offer's price and financing type.
- **You get:** a seller-ready PDF, or the review in chat.

Contract Timeline `/contract-timeline`

Every deadline in an executed contract: who owes what, by when, and what happens if it's missed.

- **Upload:** the fully executed contract with every rider, addendum and counteroffer.
- **Tell Claude:** whether you represent the buyer or the seller.
- **Example:** "Here's the executed contract for 789 Elm St. I'm the buyer's agent. Give me the timeline."
- **You get:** a PDF timeline and a calendar file you or your client can add to any calendar app. Quick questions work too: "When does the inspection period end?"
- When an amendment or extension is signed, upload it and ask to re-run the dates.

How They Fit Together

Buyer side Buyer CMA → Buyer Offer Strategy → Contract Timeline once the contract is executed
Seller side Seller CMA → Seller Offer Review when offers arrive → Contract Timeline

9 Your First Deal, Start to Finish

Here is how the pieces come together on a real transaction. Use it as a checklist until the steps are second nature.

Buyer Side

- ☐ Pull the comps CSV (section 6) and the listing's 360 Property View (section 7).
- ☐ Create a Project for the deal, such as "123 Oak St, Buyer", with your profile and both files (section 10).
- ☐ Run **/buyer-cma** with the buyer's timeline and financing. Review it, then send it.
- ☐ In the same chat, run **/buyer-offer-strategy** and ask "What should we offer?" with the buyer's limits and what the listing agent told you.
- ☐ Once the contract is executed, upload it and run **/contract-timeline**. Re-run it when an amendment is signed.

Seller Side

- ☐ Pull the comps CSV (section 6) and the 360 Property View from the last sale (section 7).
- ☐ Create a Project for the deal, such as "456 Pine Ave, Seller", with your profile and both files.
- ☐ Run **/seller-cma** with the updates, payoff and timeline. Add a listing presentation if you're pitching.
- ☐ When offers arrive, upload each one and run **/seller-offer-review**.
- ☐ Once the contract is executed, upload it and run **/contract-timeline**.

10 Best Practices

Keep Each Transaction in Its Own Project

A Project can hold a whole deal. Every chat in it starts with the files already there, so you don't upload the same documents again.

1. Create a Project for the transaction, named for the property and side (for example "123 Oak St, Buyer").
2. Add your **profile.md** and paste **project-instructions.md** into its instructions, as in section 4.
3. Add the deal's files as they come in:
 - The property report (360 Property View PDF) and the comps CSV.
 - The **CMA PDF** once it's made. Later chats read the value range from it, so the offer work starts from the same numbers.
 - Offers, pre-approval letters and proof of funds.
 - The executed contract with every rider, addendum and counteroffer, then each amendment or extension.
 - Any report you've sent the client (offer options, offer review, timeline), so the next chat knows what was already recommended.
4. Ask in a new chat inside the Project whenever the deal moves: "We got a counter, what now?" or "The inspection extension is signed, update the timeline."

In Cowork, put the files in the project's folder. Keep your main "Real Estate" Project for everything else.

Name Files So They're Easy to Find

Start with the address, then what it is and the date: "123 Oak St, Buyer CMA, 2026-09-25.pdf", "123 Oak St, Offer B, Smith.pdf". When a newer version replaces a file, remove the old one from the Project so it isn't read by mistake.

Keep the Numbers Current

- **Comps go stale.** Pull a fresh export when the last one is more than two or three weeks old, and always before an offer or a price change.
- **Download a fresh property report** when the listing's price or status has changed.
- **Give your own costs** when you have them. Closing costs, taxes and commission are estimated from the property's location and labeled "Estimate" or "Assumed". Say your numbers in the request: "Title quote is \$2,150", "Listing side is 3%, buyer side 2.5%." Florida's costs are built in; other states use national estimates until you give local numbers.
- **Keep your profile current.** Say "My new number is..." and replace profile.md in your Projects.

Review Before You Send

The reports are a strong first draft, and you know the home. Check condition calls, the tax district and anything marked for review before a client sees it. Ask for changes in the same chat.

Share Only What the Deal Needs

- **Fair housing.** Reports describe the property, the numbers and the terms, never people. If you ask for wording that could read as steering (for example about schools, safety or who a home suits), Claude writes a compliant version and says why.
- **Leave out buyer letters and personal details.** Offer reviews don't use them, and they can raise fair housing issues.
- **Agent-only information stays with you.** Owner names, mortgage history and private remarks from the property report shape Claude's advice to you but never appear in client reports.

11 Other MLS Systems

Everything in this guide works with other MLS systems. The names of the menus change, not the steps:

- **The export:** make a saved or custom export with the columns in section 5 (or as many as your MLS has). Claude matches the columns by name. When it doesn't recognize some, it matches them to what it needs and tells you.
- **The comps search:** the same statuses (active, pending, sold, expired, canceled), the last 6 months, about a 1 mile radius, the matching property types, and under your MLS's export limit.
- **The property report:** the fullest single report your MLS prints for a property: listing details, tax and public records, and the full listing history. If there isn't one, a listing sheet plus a screenshot of the history and the tax record works too.

12 Updating to a New Version

New versions ship as a new `.plugin` file, with the version number in its name.

1. Download and unzip the new version.
2. Upload the new `.plugin` file the same way as in section 3.
3. If the app keeps the old version, remove the plugin first and upload the new one.

Your profile and Project stay as they are; there's nothing to set up again. Your Basic CMA Export in the MLS stays too.
